FAQ

- What you have to bring in every class?

  Macbook & your heart **(on time, plz….)**

- What activities in class?

  Topic talk -> coding example -> exercise

- How to get the resource and material?

  Use Git (**https://github.com/bryanttang/iOS-Class-2015-9**)

Schedule

Class-1 **08/09**	• Introduction • Xcode • Your first Project
Class-2 **10/09**	• Objective-C • Storyboard • Control an UI
Class-3 **15/09**	• UIView, UIViewController • Gesture • Animation
Class-4 **17/09**	• UI Constraint • Picker View
Class-5 **22/09**	• UITableViewController • Custom Cell

Schedule

Class-6 **24/09**	• Navigation Controller • Tab bar Controller • Running Mission
Class-7 **29/09**	• MapKit • Third Party Resource • Core Location
01/10 Holiday	
Class-8 **06/10**	• Network Data (JSON, Image)* • Concurrent Programming • Plist
Class-9 **08/10**	• NSTimer • AlertView • AVAudioPlayer
Class-10 **13/10**	• Distribute your app • Final exam and Demo

Grade

How to get the Certificate?

Attendence

80% attendence

+

Final Grade

In-class performance (10%)
Final Project (40%)
Final Exam (50%)

Summary

- iOS Ecosystem
- What is iOS
- Development environment
- Objective-c Part 1

iOS Ecosystem

Benefits of iOS development

- Devices amount are limited
- Friendly development environment
- Simple app distribution channel
- Review process acts as a quality guard
- The OS is designed to work very great in mobile.

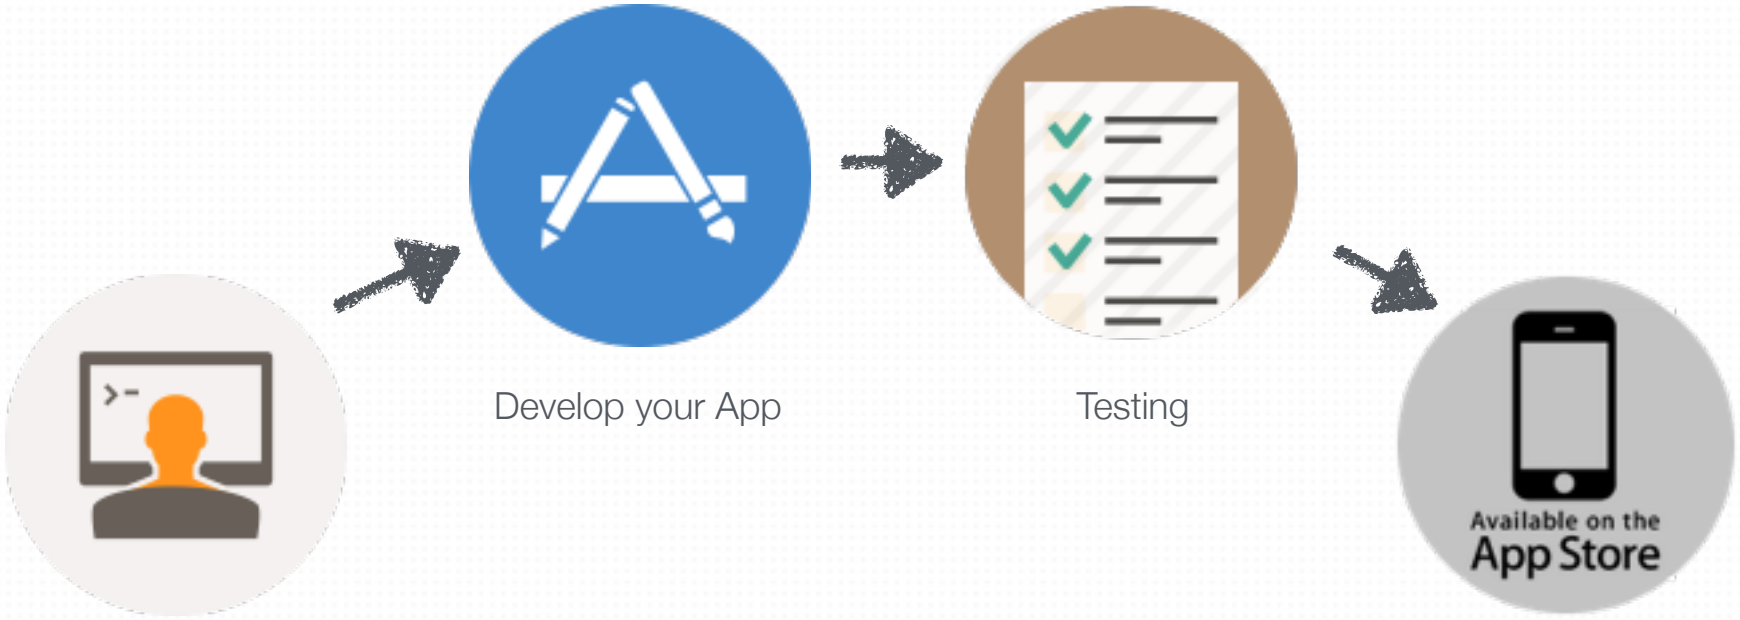
Weakness of iOS development

- Long waiting time for first submit
- Reviewing process take time
- More constrain(secure) for developing apps than other platform (Android)

We are going to learn…

- How to code by using Objective-C
- How to user storyboard to build an app
- How to use different user interface components in iOS.
- How to build apps and submit to App Store.

How do I have a app?



Become a developer

Develop your App

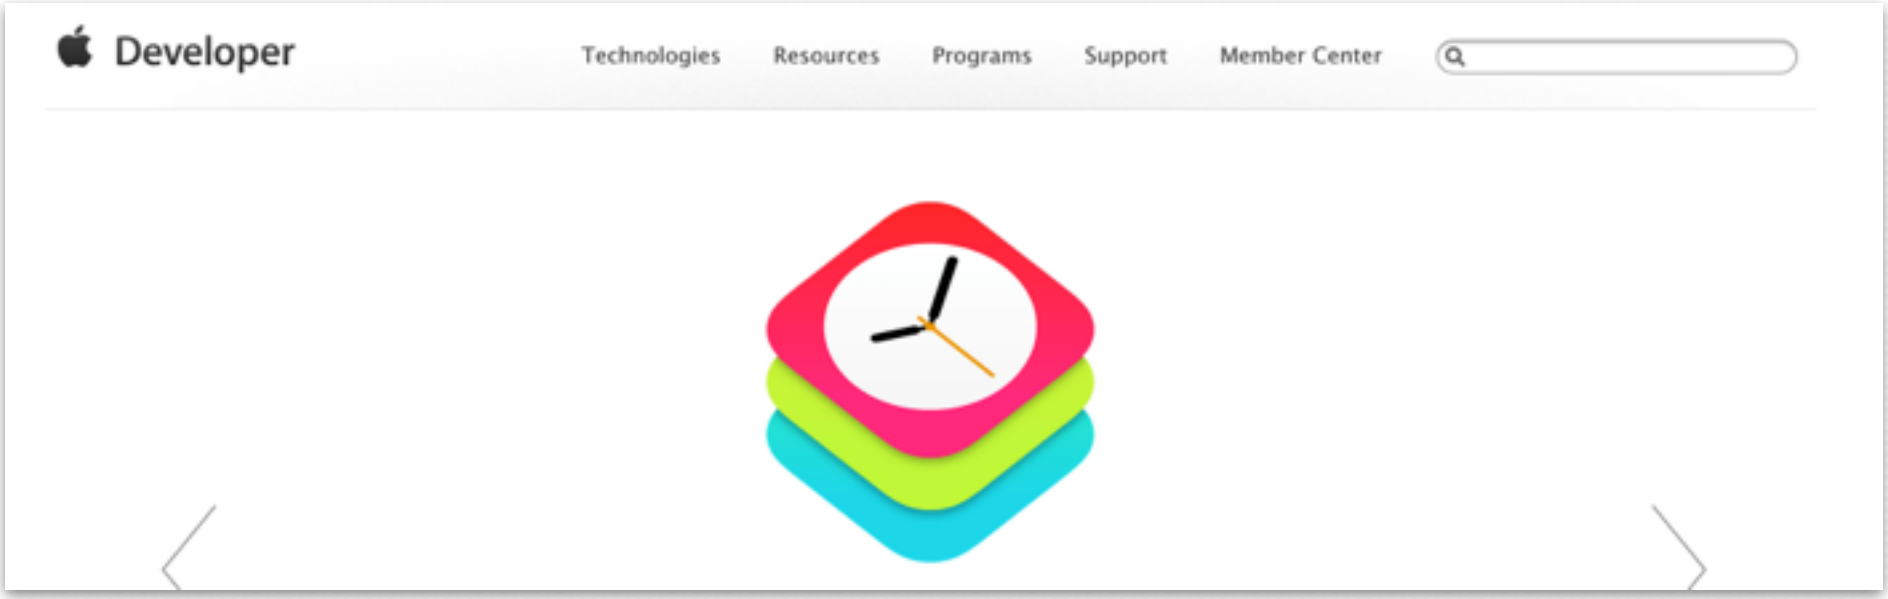
Testing

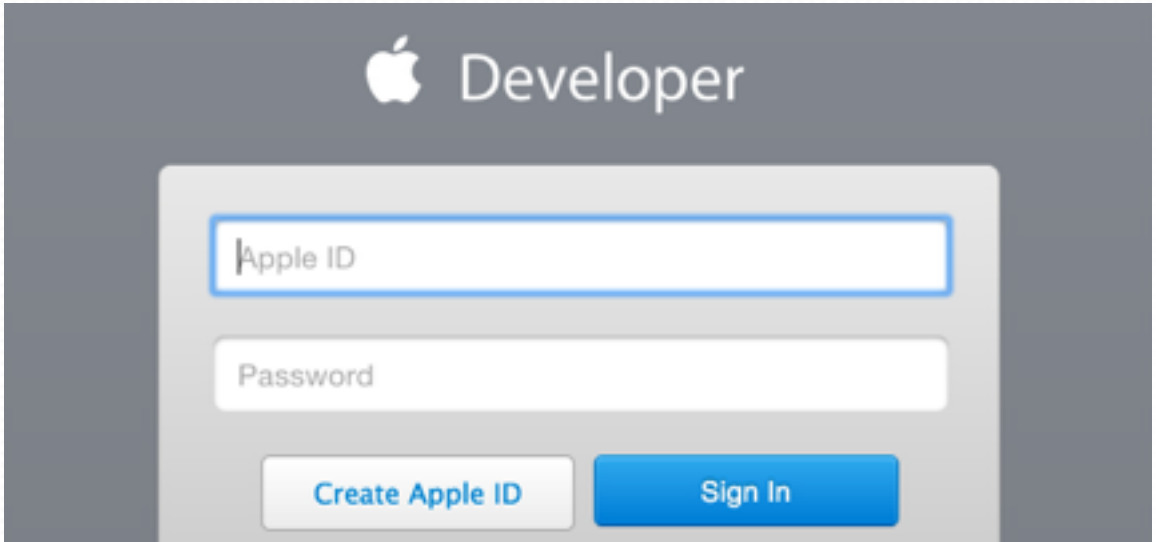
Submit to app store

Easy to become a iOS Developer

- Sign in an Apple account
- Enroll a program

Sign in Member Center





Become an iOS Developer

http://developers.apple.com

iOS

iOS Developer Program
Individual
$99 / Year

For an individual developer who will be creating free and commercial iOS apps for distribution on the App Store.

iOS Developer Program
Company
$99 / Year

For a company with a development team who will be creating free and commercial iOS apps for distribution on the App Store.

iOS Developer Enterprise Program
$299 / Year

For a company who will be creating proprietary, in-house iOS apps.

Note: A Dun & Bradstreet Number is required.

iOS Developer University Program
Free

For higher education institutions looking to introduce iOS development into their curriculum.

iOS Platform

iOS Version

Version	**iPhone OS 2**	**iPhone OS 3**	**iOS 4**	**iOS 5**	**iOS 6**	**iOS 7**
Codename	Big Bear	Kirkwood	Apex	Telluride	Sundance	Innsbruck
New APIs	n/a	1000	1500	1500	n/a	1500
New Features	n/a	100	100	200	200	n/a
Tentpoles	4	12	7	10	10	10
	Enterprise enhancements	In app purchase	Multitasking	Notification Center	Apple maps	Control Center
	Microsoft Exchange	Peer-to-peer connectivity	Folders	Newsstand	Siri enhancements	Notification Center enhancements
	iPhone SDK	Accessories access	Mail enhancements	Reminders	Facebook integration	Multitasking enhancements

8

The biggest iOS release ever.

What's breakthrough in iOS 8

- Swift
- Adaptive User Interface
- Health kit

Built-in Apps

A new way to experience your news and great features for the apps you use every day.

iPad Experience

Do more on the big iPad display — in two apps at once.

Intelligence

iOS 9 gets even smarter. And proactive suggestions make your device even more helpful.

Foundation

Faster performance, improved security, convenient updates, and longer battery life.

Multitasking

Do this.
While you do that.

When viewed using the iTunes U app for iOS, this course may also include enhanced materials such as instructor notes and assignments.

Developing iOS 8 Apps with Swift

Paul Hegarty

Details | Ratings and Reviews | Related

Description

Updated for iOS 8 and Swift. Tools and APIs required to build applications for the iPhone and iPad platforms using the iOS SDK. User interface design for mobile devices and unique user interactions using multi-touch technologies. Object-oriented design using model-view-controller paradigm, memory management, Swift programming language. Other topics include: animation, mobile device power management, multi-threading, networking and performance considerations.

Prerequisites: C language and object-oriented programming experience exceeding Programming Abstractions level, and completion of Programming Paradigms.

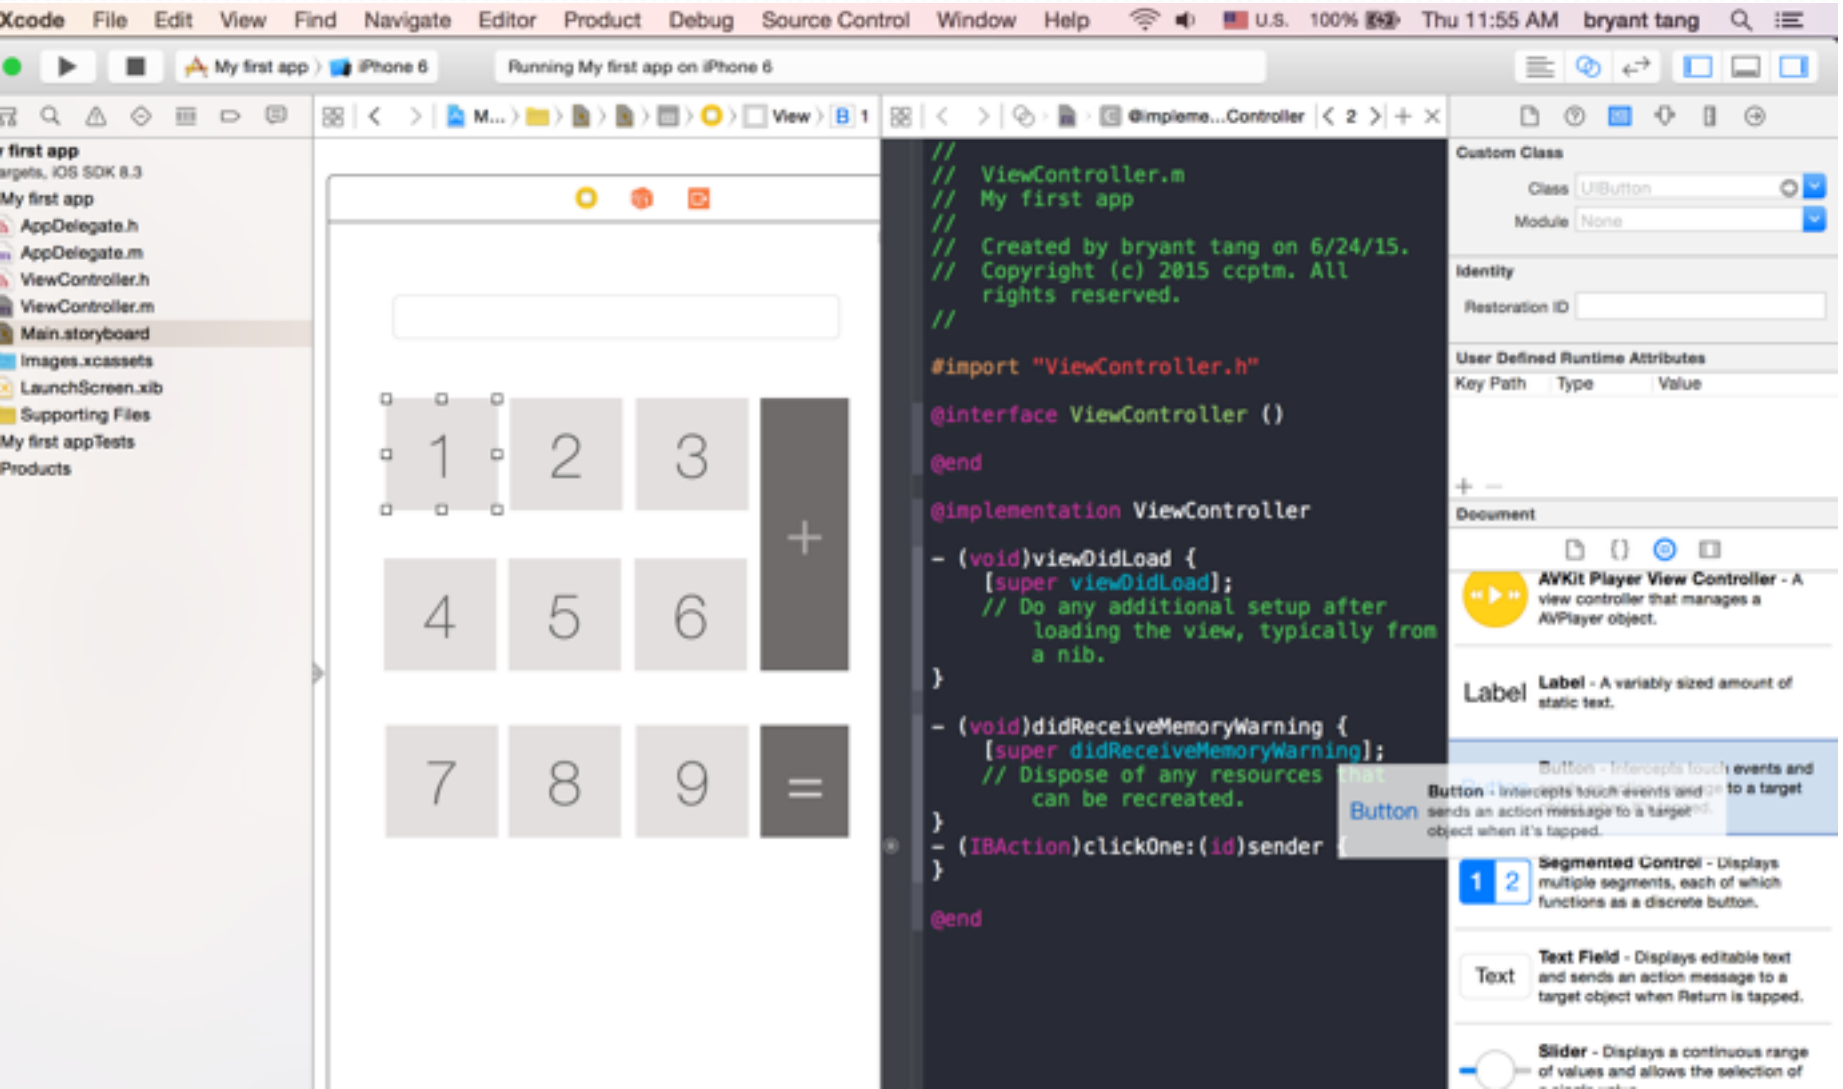
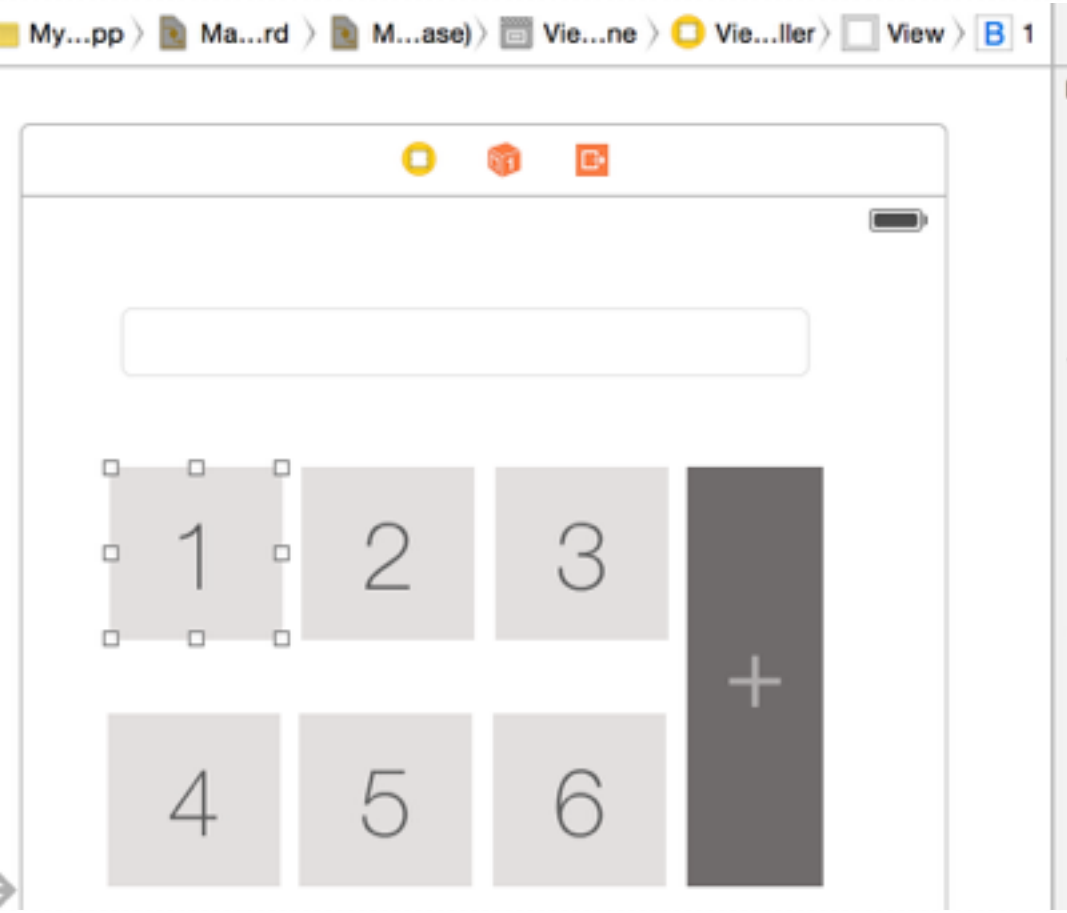
My First App

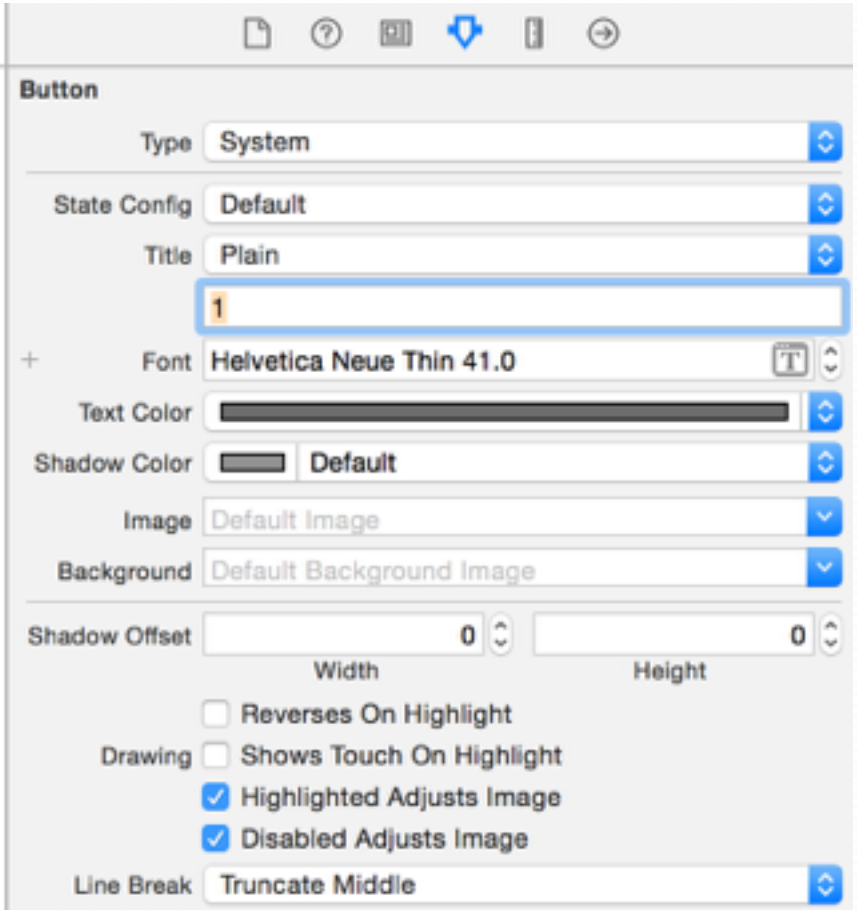
Calculator

Add elements on storyboard



Edit properties of element



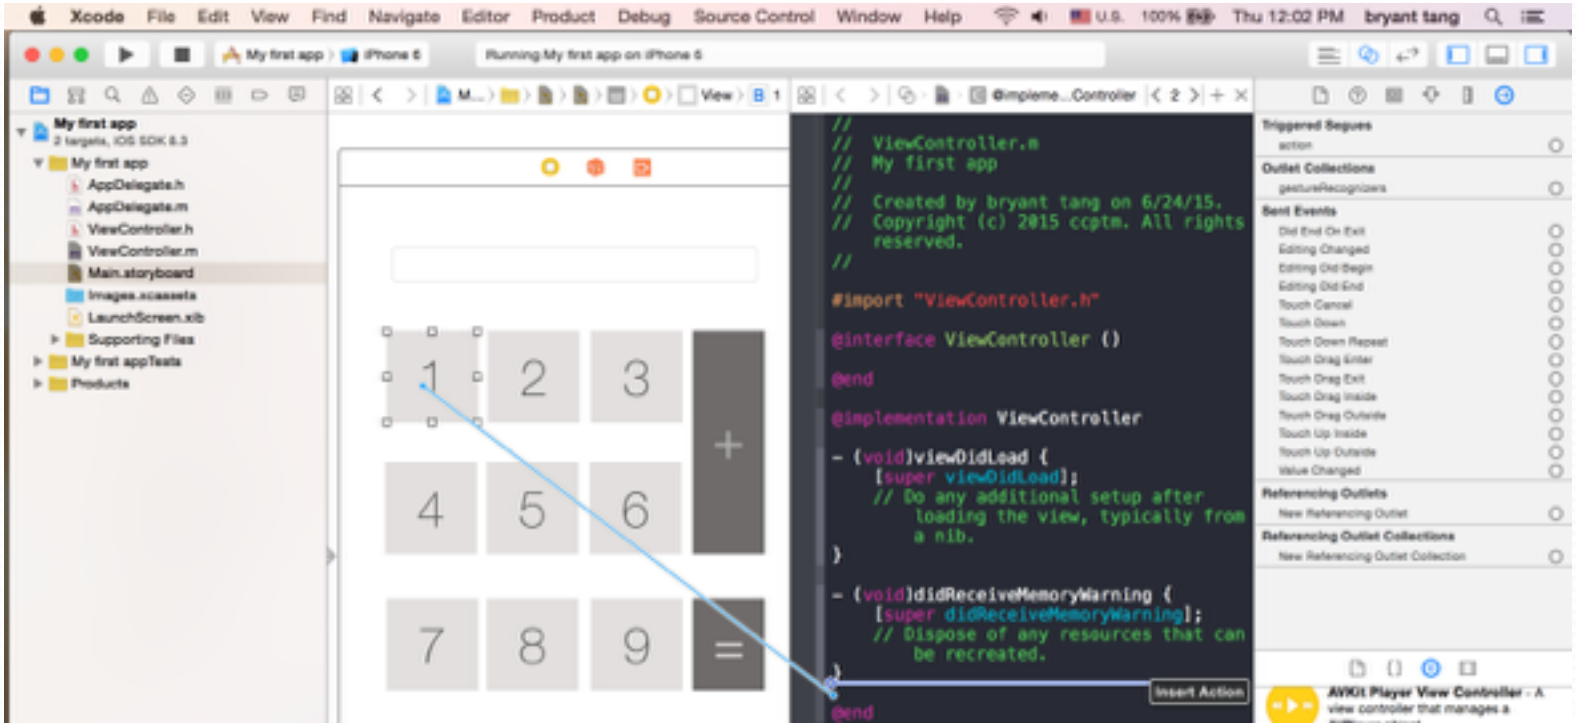


Action Connection - storyboard vs code

- Storyboard - layout design and work flow
- Program (.h or .m) - Control the element
- Connect - Storyboard and .m file

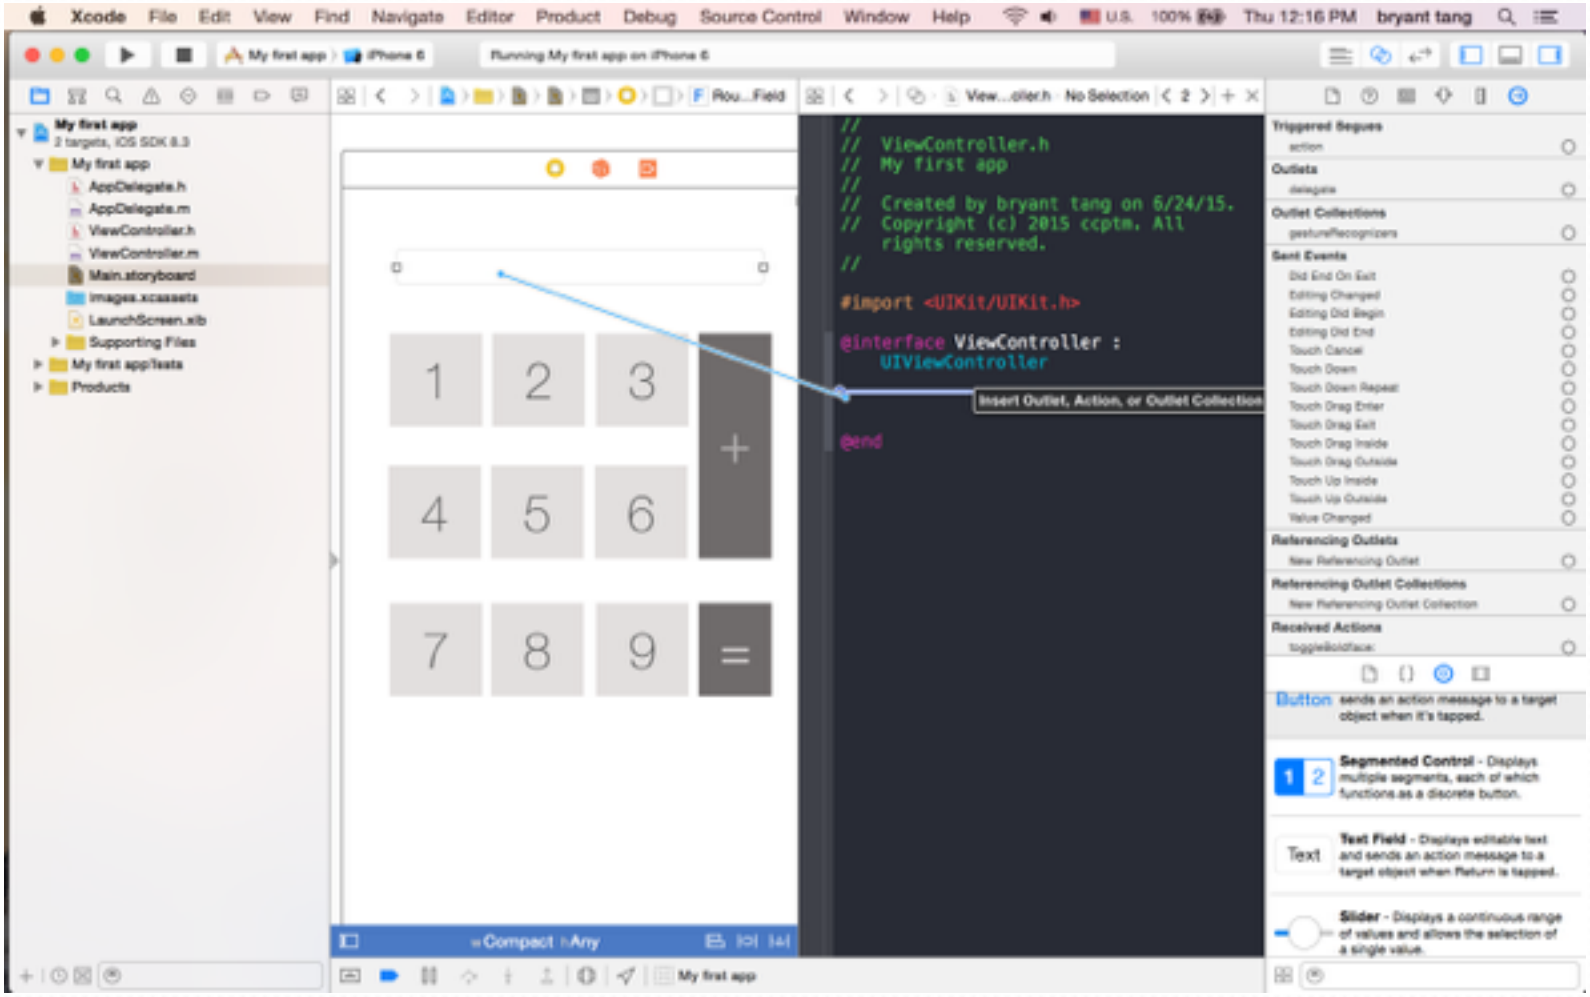
Use to view bath storyboard and program

Press"control" ,hold and drag from the element



Element Connection

- Connect - Storyboard and .h file



Objective-C Basic Coding

display one when press '1'

```
- (IBAction)clickOne:(id)sender {
    //Show 1 on textfield
    _display.text = [_display.text stringByAppendingString:@"1"];
}
```

Press '+' - save the input and clean display

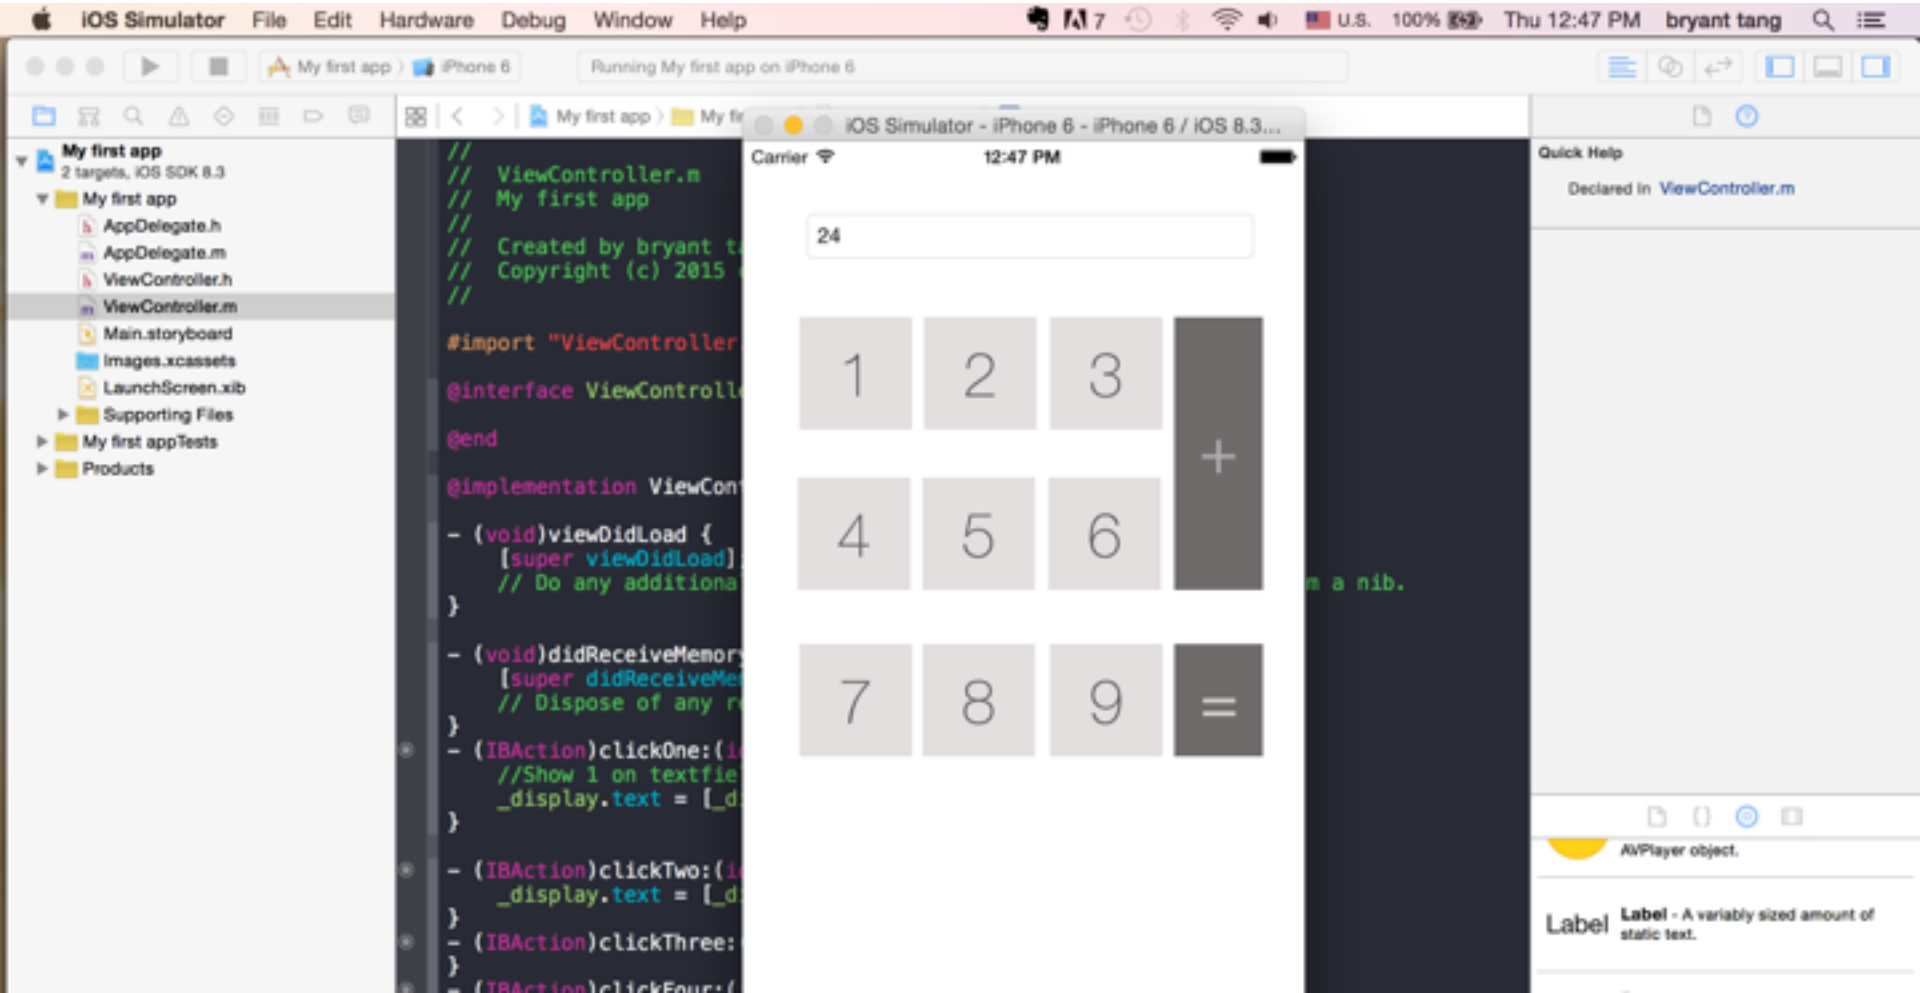
```
- (IBAction)clickPlus:(id)sender {
    store = store + [_display.text intValue];
    _display.text = @"";
}
```

Press '=' - Add two input and show on display

```
- (IBAction)clickEquel:(id)sender {
    result = store + [_display.text intValue];
    _display.text = [NSString stringWithFormat:@"%d",result];
    store = 0;
}
```

Objective-C Basic Coding

Run your app by press ‘command + r’ or



Practice

Browse the App Store. Find some apps that impress you. Discuss why they are good.

Improve your first app by adding a ‘Reset’ button or adding another functions like ‘-’ or ‘x’
